INSTRUCCIONES: Lee cuidadosamente antes de responder

This activity can be completed by a student individually, but working together in small groups (ideally 2-4 students in each) will provide more practice with the target language as students negotiate the task and each person's input.

Instructions:

1. Print a blank map and set of rectangles/cards (on this page and the next—18 in all) for each group.
2. Cut out the rectangles into individual cards and group together as a complete set with a blank map.
3. Give each group a set of cards and a blank map. Have them distribute the cards among themselves.
4. Instruct them to write in the names of each building on the map according to the directions on the cards. [Note: If they have trouble, advise them to start with cards about the hospital.]
5. When the buildings have all been labelled, allow students to check their work against the answer key/map.
6. Give students the worksheet to answer questions concerning the map.

The movie theater is next to the hospital.	The bowling alley is across the street from the hospital.	The hardware store is between the bowling alley and the drugstore.
